Meeting records Transcript

Summary

Hackathon integration and schedule planning with pricing economics and event structures discussed.

Hackathon and Event Revision
Replacement of the project expo with a 24-hour hackathon was discussed. Events were distributed across 2 days.

Technical Events and Rules
Technical treasure hunt rounds were planned. Participants must bring their own laptops.

Pricing Economics and Schedule
Registration fees and prize pools were finalized. The complete schedule will be released in advance.

Decisions

Needs Further Discussion

- **Selection between paper presentation and startup pitching** The choice between hosting research paper presentations or startup pitching events was deferred pending further faculty consultation.

Aligned

- **Replacement of project expo with hackathon** The project expo event is cancelled and replaced by a 24-hour hackathon.
- **Minimum event registration requirement for participants** Participants are required to register for a minimum of two events.
- **Technical treasure hunt event round structure** The technical treasure hunt consists of a quiz round, a file property clue round, and a code error detection round.
- **Hackathon team size and registration fee** The hackathon team size is strictly set to four members with a registration fee of 1,500 rupees per team.
- **Three-round structure for blind coding event** The blind coding competition format was established to feature three rounds comprising debugging, blind coding, and the optic code challenge.
- **Gaming event titles and team size parameters** The group selected Valorant, BGMI, and Call of Duty as the gaming event titles with a team size ranging from a minimum of 1 to a maximum of 4 members.
- **Event registration fee and package inclusions** Participants registering for an event are charged 300 rupees, which covers event entry, refreshments, and participant kits.

Next steps

- ☐ [The group] Finalize Event Durations: Define the specific duration and time requirements for each event to ensure effective management. This involves determining the total hours needed to complete every scheduled activity.
- ☐ [The group] Finalize Event Schedule: Construct the comprehensive agenda and timeline after establishing the list of events. Ensure this schedule provides a clear structure for both days of the event.
- ☐ [Vimal Raj] Edit Technical Treasure Hunt: Update the shared document to outline the 3 rounds of the technical treasure hunt. Include the 20 minute quiz, 45 minute picture description task, and 30 minute code debugging task.

- [ ] [The group] Define Hackathon Logistics: Set the official registration fee at 1500 rupees per team for the hackathon. Confirm the mandatory team size as strictly 4 members per team.
- [ ] [Ashlin Siddharth] Create Category Column: Insert a new column in the event document to specify the category or digital transition type for each event.
- [ ] [Ashlin Siddharth] Create Tagline Row: Insert an additional row under the tagline section in the event list.
- [ ] [Ashlin Siddharth] Add Duration Column: Create a new column in the event schedule to specify the required duration for each event.
- [ ] [Ashlin Siddharth] Share Updated Schedule: Save the current version of the event document and post it in the group for review.
- [ ] [Ashlin Siddharth] Coordinate Planning Meeting: Contact Ma'am to confirm her availability for a planning meeting at 9:00.

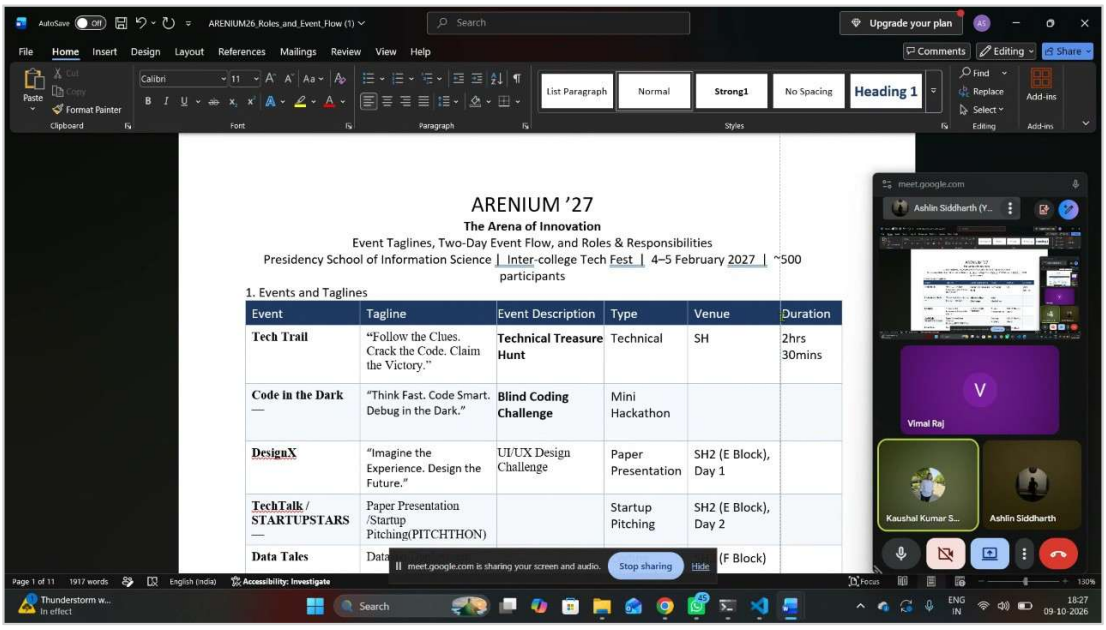

Details

- **Event List Revision and 24-Hour Hackathon Integration**: Vimal Raj and Kaushal Kumar Singh discussed replacing the project expo event with a 24-hour hackathon. Vimal Raj noted that there are a total of seven technical events and three non-technical events planned (00:04:09).
- **Event Scheduling Structure Across Two Days**: Kaushal Kumar Singh and Vimal Raj debated how to distribute events across the two days of the fest. Kaushal Kumar Singh suggested running the hackathon continuously across both days, with four events on day one and five events on day two so participants can join multiple events without schedule conflicts (00:06:51). Vimal Raj agreed that keeping events contained within single days improves management and execution (00:14:53).
- **Non-Technical Events Planning**: Vimal Raj and Kaushal Kumar Singh outlined the non-technical events, noting that the fashion show will take place on day two before the valedictory ceremony. Vimal Raj explained that gaming will be hosted on day one based on Ashlin Siddharth's experience hosting a similar event in school, while the APL event will be scheduled for day two (00:10:01).
- **Registration Targets and Schedule Release**: Kaushal Kumar Singh and Vimal Raj established that participants must register for a minimum of two

events, and the complete schedule should be released one month in advance to facilitate registration. Kaushal Kumar Singh emphasized that finalizing the event list and schedule must precede rulebook creation and guideline discussions (00:12:04).

- **Technical Treasure Hunt Structure and Rounds**: Kaushal Kumar Singh and Vimal Raj planned the first technical event, titled "Technical Treasure Hunt" (Tech Trail), which consists of three distinct rounds (00:13:31) (00:47:48). Round one utilizes Kahoot to display 20 questions in 20 minutes covering riddles, logical puzzles, and technical reasoning (00:44:55) (00:54:11). Round two features a "pickathon" where participants have 45 minutes to find clues within file properties and descriptions (00:47:48) (00:54:11). Round three requires participants to review a block of code within 30 minutes to identify syntax and logical errors without performing full debugging (00:49:26) (00:55:40).
- **Logistics and Proctoring for Technical Events**: Ashlin Siddharth, Kaushal Kumar Singh, and Vimal Raj discussed event venues and equipment constraints. Kaushal Kumar Singh insisted that participants must bring their own laptops because college computer labs are restricted for security reasons and to avoid costly damage liabilities, while student volunteers will act as proctors to monitor against AI tool usage (00:50:36).
- **Cash Prize Distribution and Hackathon Fees**: Ashlin Siddharth, Vimal Raj, and Kaushal Kumar Singh reviewed the prize pools and registration economics, noting a total cash prize pool of 137,000 rupees, with 15,000 rupees allocated per standard event and 22,500 rupees for the hackathon. Vimal Raj and Kaushal Kumar Singh agreed that hackathon teams must consist strictly of four members, and the team registration fee will be set at 1,500 rupees to cover provisions like breakfast, lunch, dinner, and overnight stay (00:57:31).
- **Code in the Dark Event Structure and Rules**: Ashlin Siddharth, Kaushal Kumar Singh, and Vimal Raj discussed the setup and rules for the Code in the Dark event, determining that it would be an individual competition comprising three rounds (01:01:49). Vimal Raj explained that the first round involves debugging, the second round involves blind coding where screens are switched off to code simple problems like sums or prime numbers, and the third round is an optic code challenge requiring code in the minimum number of lines. While individual events might yield lower registrations, they noted that residency students could fill any gaps if necessary (01:05:42).

- **Schedule Spreadsheet Formatting and Event Durations**: Kaushal Kumar Singh and Ashlin Siddharth reviewed the spreadsheet schedule, adding new rows and columns for event durations (01:08:18). Ashlin Siddharth proposed setting durations to 4 hours for safety to accommodate briefings and breaks, while Vimal Raj noted that events would run for half a day following morning inaugurations (01:10:07).

ARENIUM '27

The Arena of Innovation

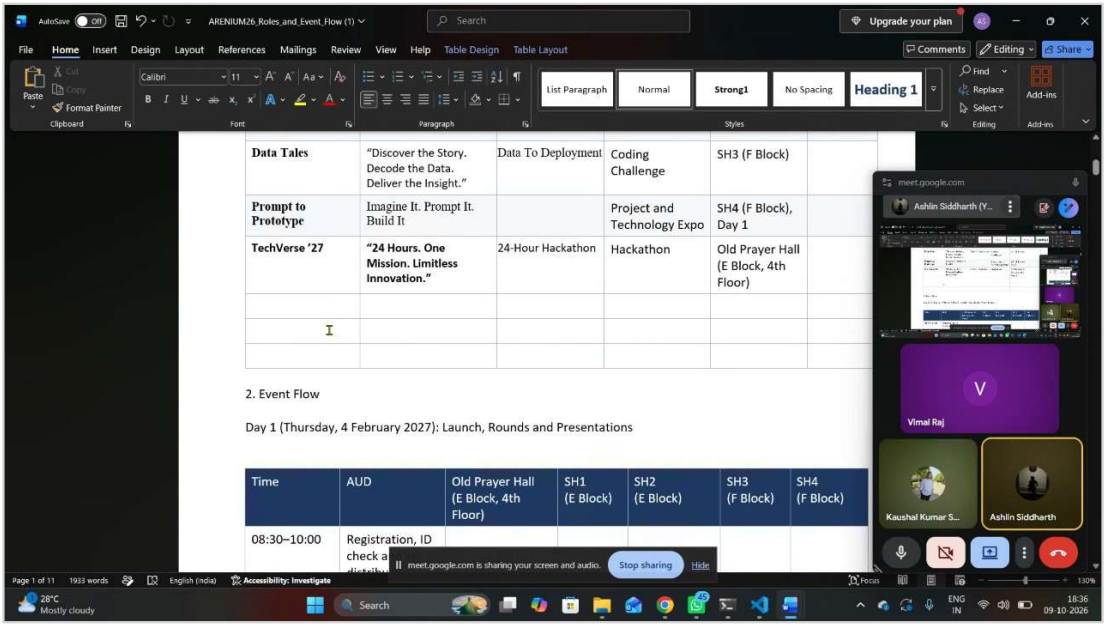

Event Taglines, Two-Day Event Flow, and Roles & Responsibilities

Presidency School of Information Science | Inter-college Tech Fest | 4–5 February 2027 | ~500 participants

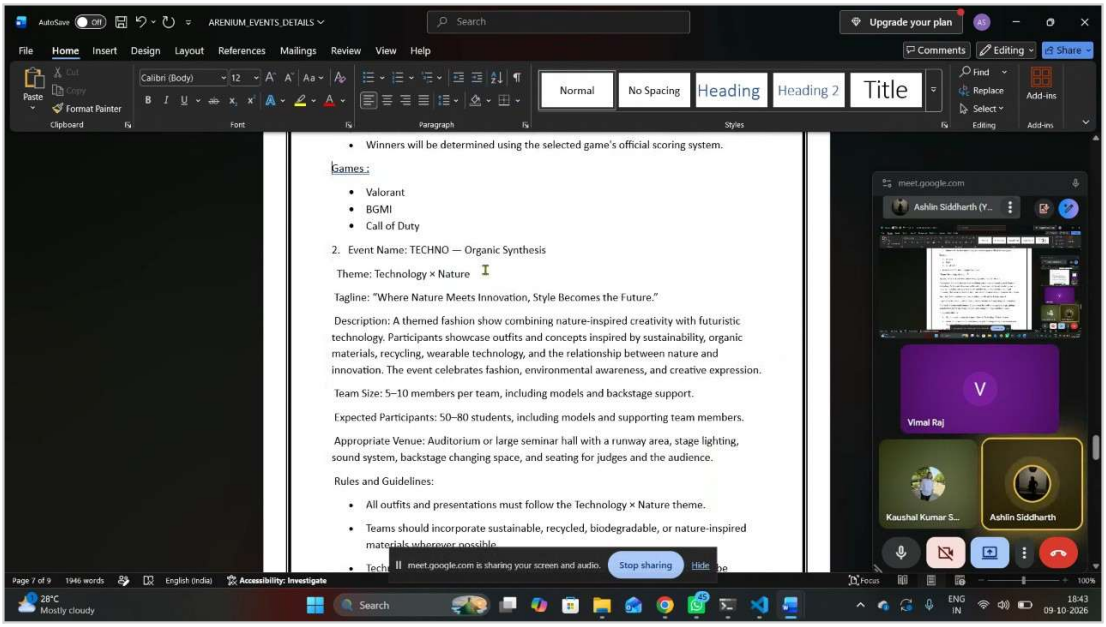

1. Events and Taglines

Event	Tagline	Event Description	Type	Venue	Duration
Tech Trail	"Follow the Clues. Crack the Code. Claim the Victory."	Technical Treasure Hunt	Technical	SH	2hrs 30mins
Code in the Dark —	"Think Fast. Code Smart. Debug in the Dark."	Blind Coding Challenge	Mini Hackathon		
DesignX	"Imagine the Experience. Design the Future."	UI/UX Design Challenge	Paper Presentation	SH2 (E Block), Day 1	
TechTalk / STARTUPSTARS —	Paper Presentation /Startup Pitching(PITCHTHON)		Startup Pitching	SH2 (E Block), Day 2	
Data Tales	Data			(F Block)	

- **Startup Pitching versus Paper Presentation Format**: Vimal Raj, Ashlin Siddharth, and Kaushal Kumar Singh debated whether to hold a research paper presentation or a Shark Tank-style startup pitching event. Vimal Raj noted that paper presentations require sponsors and publication provisions, whereas startup pitching focuses on technology and computing themes under taglines like research today transform tomorrow (01:13:46). They discussed difficulties in contacting leadership to confirm the exact format between Tik Tok startup stars and paper presentations (01:15:24).
- **Data Tales and Tech Trails Hackathon Details**: Vimal Raj, Ashlin Siddharth, and Kaushal Kumar Singh outlined the three rounds for Data Tales, which include receiving data, building products using artificial intelligence, and presenting solutions. Additionally, they confirmed that the Tech Trails hackathon would run for 24 hours using problem statements sourced from the Smart India Hackathon (01:17:24).

- **Gaming Event Squad Damage Setup and Venue**: Ashlin Siddharth, Kaushal Kumar Singh, and Vimal Raj selected Valorant, BGMI, and Call of Duty for the Squad Damage gaming event, setting expected participation at 60 to 80 students with team sizes ranging from 1 to 4 members (01:21:24) (01:26:25). Kaushal Kumar Singh explained that room matches could accommodate 20 to 30 teams and be monitored through host stats, while computer labs or classroom DJL01 would serve as the venue since system usage in restricted labs is limited (01:21:24) (01:25:13). They also briefly touched upon Techno-Organic Synthesis as a fashion show event centered on combining technology and nature (01:26:25).

- **Arenium Premier League Auction and Business Strategy**: Vimal Raj, Kaushal Kumar Singh, and Ashlin Siddharth detailed the Arenium Premier League (APL) event targeted at business and commerce students. Vimal Raj explained that the first round involves an IPL-style auction where teams use a virtual budget to bid on brands like Tata or Reliance (01:28:22). In subsequent rounds, teams analyze brand strategies, growth, and competitors, culminating in a third-round portfolio presentation focused on business improvement strategies (01:29:57).
- **Event Scheduling and Pricing Economics**: Vimal Raj, Kaushal Kumar Singh, and Ashlin Siddharth organized the event schedule across two days, allocating four events to day one and five events to day two, with fashion and APL scheduled for day two (01:31:02). They discussed pricing mechanics where outside participants pay 300 rupees per event, which includes a refreshment kit, allowing organizers to generate profit when participants register for multiple events without receiving duplicate kits (01:35:08).
- **Design X and Tech Talk Duration and Venues**: Ashlin Siddharth, Kaushal Kumar Singh, and Vimal Raj assigned venues and durations for events like Design X and Tech Talk, scheduling them across seminar halls and computer labs while noting that timings are tentative (01:36:59).
- **Winner Announcement Logistics and Overnight Stay**: Ashlin Siddharth raised concerns regarding whether winners should be announced immediately after each day-one event or the next day, and how that impacts overnight stays and hostel fees for students participating in single events (01:41:55). Kaushal Kumar Singh and Vimal Raj considered options such as requiring students to pay a 500-rupee hostel fee or encouraging them to register for additional events for 300 rupees (01:43:08).
- **Follow-up Meeting Planning and Document Sharing**: Vimal Raj, Kaushal Kumar Singh, and Ashlin Siddharth agreed to finalize their scheduling and event plans either at 9:00 or on Sunday depending on availability (01:45:00). Before concluding, Vimal Raj and Kaushal Kumar Singh instructed Ashlin Siddharth to save the edited schedule spreadsheet and share it in the group chat (01:45:45).
